5	Business Economics	CO 1	Explain the functions of market and prices as allocative mechanisms and working of the market.
		CO 2	Apply the concept of equilibrium to both microeconomics and macroeconomics.
		CO 3	Identify key macroeconomic indicators and measures of economic changes, growth, and development.
		CO 4	Identify and discuss the key concepts underlying comparative advantages.
6	Business Communication	CO 1	After successful completion of the course the learners should be able to enhance listening, speaking, reading and writing skills to meet the challenges of the world.
7	Mathematical techniques	CO 1	Organize, present and interpret statistical data, both numerically and graphically.
		CO 2	Compute measures of central tendencies and measures of dispersion for given data sets.
		CO 3	Compute probabilities and conditional probabilities in appropriate ways.
		CO 4	Make decision based on situation with and without risk using decision theory.
		CO 5	Compute Probability distribution, expectation and variance of a random variable.
<b>FYBCOM SEM II</b>			
		CO 1	Articulate the nature of service and service process.

1	Commerce-I	CO 2	Explain the basic concepts and theories of service management.
		CO 3	Identify the broad basic elements of managing service design, delivery and performance.
		CO 4	Apply the knowledge of service management to analyse the daily operation of common service organizations.
2	Foundation Course	CO 1	Identify and understand the issues related to Human rights of the marginalized, ecology and science and technology
		CO 2	Demonstrate creative thinking skills by time management, using team work and leadership skills.
3	EVS	CO 1	complex, interconnected world. The knowledge will Impress on their minds the need to practice eco-
		CO 2	management, population explosion, deforestation, global warming, energy crisis, water pollution, etc
		CO 3	better and sustainable environmental development.
4	Accountancy and Financial Management	CO 1	Get familiarized about conversion method (single entry to double entry)
		CO 2	Understand the concepts of consignment Accounting, Branch Accounting and Fire Insurance Claim.
5	Business Economics	CO 1	Identify and explain major types and causes of market failures.
		CO 2	Discuss the application of marginal analysis and its practicability.
		CO 3	Explain the significance of benefit/cost analysis.
		CO 4	Explain the contribution of economics to the analysis of non-market social issues.
6	Business Communication	CO 1	After successful completion of the course the learners should be able to enhance listening, speaking, reading and writing skills to meet the challenges of the world.
7	Mathematical techniques	CO 1	Demonstrate algebraic facility with algebraic topics including linear, quadratic, exponential, logarithmic, and trigonometric functions.
		CO 2	Compute derivative of functions of one variable and demonstrate its applications in Economics.
		CO 3	Solve simple and compound interest problems.
		CO 4	Determine the current worth and future worth of a sum of money or stream of cash flow given a specified rate of return and its applications.
	Statistical Techniques-II	CO 1	Compute and interpret linear bivariate coefficient of correlation.
		CO 2	Perform regression analysis, interpret the relation between regression coefficients and coefficient of correlation.
		CO 3	Determine trend in time series data by using linear regression trend analysis for forecasting, account for seasonal effect using decomposition and describe smoothing techniques models like moving average.
		CO 4	Demonstrate knowledge and understanding of index number theory and methods.
		CO4	Demonstrate knowledge and understanding of index number theory and methods.
		CO 5	Solve basic problems involving binomial, Poisson and normal probability distributions.
<b>SYBCOM SEM III</b>			
8	Advertising 1	CO 1	Learners will be oriented towards the practical aspects and techniques of advertising.
		CO 2	it analyses working of Ad Agency.
9	Commerce-III	CO 1	The learners will become aware about conceptual knowledge and evolution of management.
		CO 2	The learners will be familiarized with the function in management.
10	Business Economics	CO 1	Understand why household, business, government and global behavior determine the aggregate demand for goods and services
		CO 2	Understand why the behavior of businesses and the rest of the world determine the aggregate supply of goods and services

		CO 4	<ul style="list-style-type: none"> <li>To impart knowledge of concepts, process, techniques and application of wealth management</li> </ul>
11	Strategic Human Resource Management	CO 1	<ul style="list-style-type: none"> <li>Learners will be able to understand the integrated perspective on role of HRM in modern business</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Ability to plan human resources and implement techniques of job design</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Ability to handle employee issues and evaluate the new trends in HRM</li> </ul>
12	Performance Management and Career Planning	CO 1	<ul style="list-style-type: none"> <li>Improving skills of learner in setting clear expectations and objectivity by measuring individual performance along with competencies as key measures</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Identify and regularize best performance management tools and techniques to enhance the performance and motivation level among low performing as well as high performing team members</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Make learners ready towards planning their career and growth cycle in appropriate manner</li> </ul>
13	Industrial Relation	CO 1	<ul style="list-style-type: none"> <li>Understand labor , industrial relations systems disciplinary issues, grievances and participatory processes at work</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To know and understand the working of trade union and collective bargaining</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Know the various acts pertaining to maintenance of industrial relations</li> </ul>
14	Talent and Competency Management	CO 1	<ul style="list-style-type: none"> <li>Learners are able to understand the concepts of talent and competency</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Learners can understand the concepts of competency mapping</li> </ul>

**TYBMS SEM 6**

1	Operation Research	CO 1	<ul style="list-style-type: none"> <li>Demonstrate mathematical concepts and models effective for execution in Industry</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Interpret and apply concepts like Assignment, Sequencing in practical situations</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Evaluate working of Game theory along with model like Project Crashing to take cost saving &amp; Business Decisions</li> </ul>
2	Project Work	CO 1	<ul style="list-style-type: none"> <li>To inculcate habit of research among learners</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To help student in understanding application of statistical tools and techniques</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>To create the habit of reading new contact online as well as through the form of reference book</li> </ul>
3	International Marketing	CO 1	<ul style="list-style-type: none"> <li>To get an overview of working of international market</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Understanding of the relevance of international marketing mix</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>To study the working of international brand along with their marketing strategies</li> </ul>
4	Retail Management	CO 1	<ul style="list-style-type: none"> <li>Familiarize students with details retail managements concepts &amp; operations</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Aware of the various legal &amp; ethical aspects of retail management</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Know the emerging trends in retail management</li> </ul>
		CO 4	<ul style="list-style-type: none"> <li>To make learner understand concept of Organized Retailing</li> </ul>
5	Brand Management	CO 1	<ul style="list-style-type: none"> <li>To Define and Exemplify brand concepts used by Companies by discussing the rationale for the application.</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To provide the appropriate theories, models, and other tools to make better branding decisions.</li> </ul>

		CO 3	<ul style="list-style-type: none"> <li>To formulate effective branding strategies and their executions for both consumer and business products/services.</li> </ul>
6	Media Planning and Management	CO 1	<ul style="list-style-type: none"> <li>To make learner aware about different media strategies</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Learning towards allotment of budget for media activities</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Identify media metrics, benchmarking metrics, Plan metrics and making learner implement those</li> </ul>
7	International Finance	CO 1	<ul style="list-style-type: none"> <li>To gain the knowledge of working of international financial market</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To explore the various method to minimize risk in global transactions</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Understanding of direct and indirect rate and cross currency rate</li> </ul>
8	Indirect Taxation	CO 1	<ul style="list-style-type: none"> <li>Understand basic Concept of GST and Advantage of GST act over Previous indirect tax structure</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To know eligibility for registration under GST Act</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Understand different type of registration and its applicable</li> </ul>
		CO 4	<ul style="list-style-type: none"> <li>Able to apply for registration of GST (Obtaining new GST No)</li> </ul>
		CO 5	<ul style="list-style-type: none"> <li>Understand input credit system</li> </ul>
		CO 6	<ul style="list-style-type: none"> <li>Apply different provisions of GST rules to compute GST liability</li> </ul>
9	Finance for Rural Development	CO 1	<ul style="list-style-type: none"> <li>To make students understand about rural environment</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To make students aware about the financial needs of rural society</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>To familiarize students about rural finance services and avenues</li> </ul>
		CO 4	<ul style="list-style-type: none"> <li>To discuss about the development possibilities and importance of rural development for Indian Economy</li> </ul>
		CO 5	<ul style="list-style-type: none"> <li>To impart knowledge of Basic concept, functions, process &amp; techniques of rural development finance</li> </ul>
10	Innovative Financial Services	CO 1	<ul style="list-style-type: none"> <li>To make students understand about various financial services (&amp; products)</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To familiarize students about the process of working of financial services</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>To discuss about emerging financial services in the era of technology &amp; globalization</li> </ul>
		CO 4	<ul style="list-style-type: none"> <li>To impart knowledge of Basic concept, functions, process &amp; techniques of financial services</li> </ul>
11	HRM in Global Perspective	CO 1	<ul style="list-style-type: none"> <li>Learners will be able to understand about skills &amp; right attitude necessary to provide effective leadership in a global environment</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Learners will be able to understand the human resource management practices like recruitment and selection, training, performance management and international industrial relations at an international environment</li> </ul>
12	Organisational Development	CO 1	<ul style="list-style-type: none"> <li>Understand the concepts and theories of Organizational Development</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Analyze and evaluate the role of HR and OD in relation to organizational outcomes such as organizational effectiveness, productivity and quality of working life</li> </ul>
13	Indian Ethos	CO 1	<ul style="list-style-type: none"> <li>Familiarize the process and working of Indian Ethics</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>Understanding Management through ancient Indian Literature</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>Understanding difference of Indian as well as International working styles and differences</li> </ul>
14	HRM in Service sector Management	CO 1	<ul style="list-style-type: none"> <li>To study the relevance of HR in booming Service Industry</li> </ul>
		CO 2	<ul style="list-style-type: none"> <li>To understand different job profiles available for HR professionals in Service Industry</li> </ul>
		CO 3	<ul style="list-style-type: none"> <li>To understand the relevance of human element in creating customer satisfaction through service quality, by understanding different working models</li> </ul>
		CO 4	<ul style="list-style-type: none"> <li>To offer diverse learning opportunities to develop analytical and soft skills among the budding HR Professionals</li> </ul>

**Department of Accounting and Finance (Programme Outcome)**

Sr. No.	Programme	Programme Outcome	Programme Outcome
1	Bachelor of Commerce in Accounting and	PO1	<ul style="list-style-type: none"> <li>Demonstrate an understanding of the economic, regulatory, ethical, Business functions and processes, social and global contexts in which accounting and finance operate for the firm, financial market and the public sector.</li> </ul>
		PO2	<ul style="list-style-type: none"> <li>Demonstrate a knowledge of theories, current and alternative practices of accounting, including recognition, disclosure of financial statements, financial reporting, cost accounting, auditing and taxation system in a local as well as international socio-economic domain.</li> </ul>
		PO3	<ul style="list-style-type: none"> <li>Demonstrate in depth awareness of the international, regional and local issues related to accounting and financial integrity area, the role of accountants and financial players.</li> </ul>
		PO4	<ul style="list-style-type: none"> <li>Develop Critical Thinking Inculcating an intellectually disciplined process of actively conceptualizing, applying, analyzing, synthesizing, and evaluating information gathered from, or generated by, observation, experience, reasoning, as a guide to action.</li> </ul>
		PO5	<ul style="list-style-type: none"> <li>Integrate research-related skills through research projects of current relevance and critical outcome.</li> </ul>

Finance	PO6	· Develop scientific Reasoning Business data analysis in accounting and finance that is researched/observed or collected through surveys for projects and term papers requires logical thinking and reasoning for arriving at conclusions and analytical outcomes.
	PO7	· Use modern tool usage and create, select, and apply appropriate techniques, resources, and modern statistical tools & software for accounting and finance studies.
	PO8	· Demonstrate self-Directed Learning Curiosity in accounting and finance studies to acquire general knowledge and explore information to make better decisions, develop rational and logical beliefs and thinking.
	PO9	· Create awareness of Moral and Ethical Awareness/Reasoning through sensitization and cultivation of moral and ethical values.
	PO10	· Develop lifelong Learning towards better learning and application on business data; also show awareness for generation of new ideas and innovation.

**Department of Accounting and Finance (Programme Specific Outcome)**

Sr. No.	Programme	Specific Outcome	Programme Specific Outcome
1	Bachelor of Commerce in Accounting and Finance	PSO1	· Apply techniques of recording and summarising transactions; financial statements preparation, performance measurement, audit planning and control.
		PSO2	· Apply current technical language in Accounting and Finance to inform managerial decisions and reach a valid conclusion.
		PSO3	· Perform International Financial Reporting standards in all aspects of accounting, calculation of financial ratios and interpretation, tax planning, budgeting, investment assets pricing models, financing and complicated corporate strategy.

**Department of Accounting and Finance (Course Outcome)**

**FYBAF SEM-I**

1	Financial Accounting	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
		CO 3	To acquaint them with practical approach to accounts .
2	Business Economics (Micro)	CO 1	To expose Students of Commerce to basic micro economic concepts and inculcate an analytical approach to the subject matter.
		CO 2	To stimulate the student interest by showing the relevance and use of various economic theories.
		CO 3	To apply economic reasoning to problems of business.
3	Financial Management	CO 1	To Understand concepts relating to finance and investment
		CO 2	To know ration analysis
		CO 3	To understand the concept of shares and to calculate Dividend
4	Cost accounting	CO 1	To use costing to make decision.
		CO 2	To understand and to calculate various types of costs
		CO 3	To understand the concept and application of profit and loss in business.
5	Commerce	CO 1	To Understand about interface of Business and environment.
		CO 2	To Know about Entrepreneurship and Global Business
6	Business Communication	CO 1	To understand the concept, process and importance of communication.
		CO 2	To develop awareness regarding new trends in business communication.
		CO 3	To provide knowledge of various media of communication.
		CO 4	To develop business communication skills through the application and exercises.
7	Foundation Course	CO 1	Urban-rural disparities in access to health and education and fundamental rights.
		CO 2	Gain an overview of significant soft skills required for addressing competition in market for jobs or starting own business or other career choices.

**FYBAF SEM-II**

1	Auditing	CO 1	To acquaint themselves about the concept and principles of Auditing, Audit process, Assurance Standards, Tax Audit, and Audit of computerized Systems.
		CO 2	To get knowledge about preparation of Audit report.
2	Business Law	CO 1	To impart students with the knowledge of fundamentals of Company Law.
		CO 2	To update the knowledge of provisions of the Companies Act of 2013.
		CO 3	To apprise the students of new concepts involving in company law regime.
		CO 4	To acquaint the students with the duties and responsibilities of Key Managerial Personnel.
		CO 5	To impart students the provisions and procedures under company law.
3	Foundation Course	CO 1	To develop awareness about environment
		CO 2	To understand rights and duties of citizen

		CO 3	To spread awareness about current social issues
4	Business Communication	CO 1	To understand the concept, process and importance of communication.
		CO 2	To develop awareness regarding new trends in business communication.
		CO 3	To provide knowledge of various media of communication.
		CO 4	To develop business communication skills through the application and exercises.
5	Financial accounting	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
6	Innovative Financial services	CO 1	To know about financial and capital market functioning
		CO 2	To understand about various financial and derivative instruments.
7	Mathematics	CO 1	To understand the concept of Simple interest, compound interest and the concept of EMI.
		CO 2	To understand the concept of shares and to calculate Dividend B.Com.
		CO 3	To understand the concept of population and sample and to use frequency distribution to make decision.
<b>SYBAF SEM-III</b>			
8	Information Technology	CO 1	To make the students familiar with Computer environment.
		CO 2	To make the students familiar with the basics of Operating System and business communication tools.
		CO 3	To make the students familiar with basics of Network, Internet and related concepts.
		CO 4	To make awareness among students about applications of Internet in Commerce.
		CO 5	To enable students to develop their own web site.
9	Financial market Operations	CO 1	To acquaint the students with the fundamentals of banking.
		CO 2	To develop the capability of students for knowing banking concepts and operations.
		CO 3	To make the students aware of banking business and practices.
		CO 4	To give thorough knowledge of banking operations.
		CO 5	To enlighten the students regarding the new concepts introduced in the banking system.
10	Business law	CO 1	To impart students with the knowledge of fundamentals of Company Law.
		CO 2	To update the knowledge of provisions of the Companies Act of 2013.
		CO 3	To apprise the students of new concepts involving in company law regime.
		CO 4	To acquaint the students with the duties and responsibilities of Key Managerial Personnel.
		CO 5	To impart students the provisions and procedures under company law.
11	Business Communication	CO 1	To understand the concept, process and importance of communication.
		CO 2	To develop awareness regarding new trends in business communication.
		CO 3	To provide knowledge of various media of communication.
		CO 4	To develop business communication skills through the application and exercises.
12	Financial accounting	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
13	Innovative Financial services	CO 1	To know about financial and capital market functioning
		CO 2	To understand about various financial and derivative instruments.
14	Direct Taxation	CO 1	To understand the basic concepts and to acquire knowledge about Computation of Income, Submission of Income Tax Return, Advance Tax, and Tax deducted at Source, Tax Collection Authorities under the Income Tax Act, 1961.
<b>SYBAF SEM-IV</b>			
8	Business law	CO 1	To impart students with the knowledge of fundamentals of Company Law.
		CO 2	To update the knowledge of provisions of the Companies Act of 2013.
		CO 3	To apprise the students of new concepts involving in company law regime.
9	Research methodology	CO 1	To understand about various concepts, types and process of research .
		CO 2	To sensitize about need and importance of research in business and accounts.
10	Fc In management	CO 1	To know about prionciples and levels of management
		CO 2	To understand the training, motivation, morale, leadership tactics used in management.
11	Taxation	CO 1	To understand the basic concepts and to acquire knowledge about Computation of Income, Submission
12	Information Technology	CO 1	To make the students familiar with Computer environment.
		CO 2	To make the students familiar with the basics of Operating System and business communication tools.
		CO 3	To make the students familiar with basics of Network, Internet and related concepts.
		CO 1	To impart the knowledge of various accounting concepts

13	Financial accounting	CO 2	To instill the knowledge about accounting procedures, methods and techniques.
		CO 3	To acquaint them with practical approach to accounts .
<b>TYBAF SEM-V</b>			
14	FA V	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
15	FA VI	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
16	CA	CO 1	To Impart basic Cost Concept
		CO 2	Elements of cost.
		CO 3	Ascertainment of Material and Labour Cost.
17	Taxation	CO 1	To understand the basic concepts and to acquire knowledge about Computation of Income, Submission of Income Tax Return, Advance Tax, and Tax deducted at Source, Tax Collection Authorities under the Income Tax Act, 1961.
18	MA	CO 1	To impart the knowledge of various management accounting concepts
		CO 2	To instill the knowledge about management accounting procedures, methods and techniques.
<b>TYBAF SEM-VI</b>			
14	FA V	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
15	FA VI	CO 1	To impart the knowledge of various accounting concepts
		CO 2	To instill the knowledge about accounting procedures, methods and techniques.
16	CA	CO 1	To impart knowledge regarding costing techniques.
		CO 2	To provide training as regards concepts, procedures and legal Provisions of cost audit.
17	Taxation	CO 1	To understand the basic concepts and to acquire knowledge about Computation of Income, Submission of Income Tax Return, Advance Tax, and Tax deducted at Source, Tax Collection Authorities under the Income Tax Act, 1961.
18	Economics	CO 1	To expose students to a new approach to the study of the Indian Economy.
		CO 2	To help the students in analyzing the present status of the Indian Economy.
		CO 3	To enable students to understand the process of integration of the Indian Economy with other economics of the world.
		CO 4	To apply economic reasoning to problems of the economy.

### Department of Information Technology (Programme Outcome)

Sr. No.	Programme	Programme Outcome	Programme Outcome
1	Bachelor of Science in Information technology	PO1	Apply the knowledge of mathematics, science and computing in the core information technologies
		PO2	Select and apply current techniques, skills, and tools necessary for computing practice and integrate IT-based solutions into the user environment effectively.
		PO3	Identify, design, and analyze complex computer systems and implement and interpret the results from those systems.
		PO4	Design and develop software solutions for contemporary business environments by employing appropriate problem solving strategies.
		PO5	Learn future technologies through acquired foundational skills and knowledge and employ them in new business environments.
		PO6	Practice communication, problem solving and decision-making skills through the use of appropriate technology and with the understanding of the business environment.

### Department of Information Technology (Programme Specific Outcome)

Sr. No.	Programme	Specific Outcome	Programme Specific Outcome
1	Bachelor of Science in Information technology	PSO1	Explore technical comprehension in varied areas of Computer Applications and experience a conducive environment in cultivating skills for thriving career and higher studies.
		PSO2	Comprehend, explore and build up computer programs in the allied areas like Algorithms, System Software, Multimedia, Web Design, python, web programming, software and Data Analytics for efficient design of computer-based systems of varying complexity.
		PSO3	Acquire skills required for information technology professionals, able to work effectively at planning, implementing, configuring and maintaining an organization's computing infrastructure.

## Department of Information Technology (Course Outcome)

Sr. No.	Course	Outcome	Course Outcome
<b>FYBSCIT SEM 1</b>			
1	Imperative Programming	CO 1	Distinguish between different programming paradigms
		CO 2	Understand basic notions of imperative programming such as loops, basic data structure such as arrays.
		CO 3	Understand the imperative implementation of some common algorithms.
2	Digital Electronics	CO 1	To learn basic concepts of Analog and Digital Signals/ Systems.
		CO 2	The concept of various number systems: Binary, Octal, Decimal and Hexadecimal.
		CO 3	The concept of various Logic gates: Basic and Combinational
		CO 4	The concept of various IC and other components.
		CO 5	To understand Boolean algebra.
		CO 6	Design and implementation of combinational circuits.
		CO 7	Design and implementation of Sequential circuits and shift registers.
3	Operating System	CO 1	To learn the fundamentals of Operating Systems.
		CO 2	To learn the mechanisms of OS to handle processes and threads and their communication
		CO 3	To learn the mechanisms involved in memory management in contemporary OS
		CO 4	To gain knowledge on distributed operating system concepts that includes architecture, Mutual exclusion algorithms, deadlock detection algorithms and agreement protocols
		CO 5	To know the components and management aspects of concurrency management
		CO 6	To learn programmatically to implement simple OS mechanisms
4	Discrete Mathematics	CO 1	Write an argument using logical notation and determine if the argument is or is not valid.
		CO 2	Demonstrate the ability to write and evaluate a proof or outline the basic structure of and give examples of each proof technique described.
		CO 3	Understand the basic principles of sets and operations in sets.
		CO 4	Prove basic set equalities.
		CO 5	Apply counting principles to determine probabilities.
5	Communication skills	CO 1	Understand the role of communication in personal & professional success.
		CO 2	Develop awareness of appropriate communication strategies.
		CO 3	Analyze a variety of communication acts.
<b>FYBSCIT SEM 2</b>			
1	Object Oriented Programming	CO 1	Students will learn the syntax and semantics of the C++ programming language
		CO 2	Students will able to apply object oriented techniques to solve bigger computing problems
		CO 3	To learn how to design C++ classes for code reuse
		CO 4	Able to build C++ classes using appropriate encapsulation and design principles
		CO 5	To learn how to design and implement generic classes with C++ templates.
2	Web Programming	CO 1	To get familiar with basics of the Web Programming in HTML.
		CO 2	To learn different Objects of HTML Web Programming and PHP
		CO 3	To get familiar with basics of the Web Programming in PHP and MySQL.
		CO 4	To get familiar with basics of the Web Programming in CSS.
		CO 5	To acquire knowledge and skills for creation of web site considering both client and server side programming
3	Numerical & Statistical Methods	CO 1	Recognize the error in the number generated by the solution.
		CO 2	Compute solution of algebraic and transcendental equation by numerical methods like Bisection method and Newton Rapshon method.
		CO 3	Apply method of interpolation and extrapolation for prediction.
		CO 4	Understand the mathematical tools that are needed to solve optimization problems.
		CO 5	Use mathematical software to solve the proposed models.
4	Green Computing	CO 1	The course treats the concept of green IT, environmental perspectives on IT use and standards and certifications related to sustainable IT products
		CO 2	The course also deals with methods and tools to measure energy consumption and efforts to improve energy efficiency in the use of IT with a focus on computer centers.
5	Micro processor architecture	CO 1	Understanding basic computer, its design and its organization
		CO 2	Demonstrating working of microprocessor
		CO 3	Getting familiar with programming language and other operations of microcontroller
<b>SYBSCIT SEM 3</b>			
1	Python Programming	CO 1	Use if-else statements and switch-case statements to write programs in Python to tackle any decision-making scenario
		CO 2	Develop cost-effective robust applications using the latest Python trends and technologies
		CO 3	Design real life situational problems and think creatively about solutions of them.
		CO 4	Design GUI Programming and Databases operations in Python
2	Data Structure	CO 1	Select appropriate data structures as applied to specified problem definition.
		CO 2	Implement operations like searching, insertion, and deletion, traversing mechanism etc. on various data structures.
		CO 3	Students will be able to implement Linear and Non-Linear data structures.

		CO 4	Implement appropriate sorting/searching technique for given problem.
3	Computer Networks	CO 1	Study the fundamental terminology and components of the computer networking.
		CO 2	To study and enumerate the layers of OSI model and TCP/IP model.
		CO 3	To Acquire knowledge of Application layer and Presentation layer paradigms and protocols.
		CO 4	Study Session layer design issues, Transport layer services, and protocols.
		CO 5	Gain core knowledge of Network layer routing protocols and IP addressing.
		CO 6	Study data link layer concepts, design issues, and protocols.
		CO 7	Read the fundamentals and basics of Physical layer, and will apply them in real time applications.
4	Database Management Systems	CO 1	Students will be able to explain the features of database management systems and Relational database
		CO 2	Students will be able to design conceptual models of a database using ER modeling for real life applications
		CO 3	Students will be able to construct queries in Relational Algebra
		CO 4	Students will be able to create and populate a RDBMS for a real life application, with constraints and keys, using SQL
		CO 5	Students will be able to retrieve any type of information from a data base by formulating complex queries in SQL
		CO 6	Students will be able to analyze the existing design of a database schema and apply concepts of normalization to design an optimal database
		CO 7	Students will be able to build indexing mechanisms for efficient retrieval of information from a database
5	Applied Mathematics	CO 1	Acquire the basic skills and conceptual understanding regarding differential, integral and multivariable calculus, as well as that of fundamental mathematical objects introduced in our core courses such as sets, functions, equations, vectors, matrices, and groups.
		CO 2	Demonstrate mathematical thinking skills, progressing from a procedural and computational understanding of mathematics to logical reasoning, pattern recognition, generalization, and abstraction, and to a formal proof.
		CO 3	Acquire proficiency in the use of technology to assist in learning and investigating mathematical ideas and in problem-solving.
		CO 4	Use knowledge of content and mathematical procedures to solve problems and make connections between the different areas of mathematics.
<b>SYBSCIT SEM 4</b>			
1	Core Java	CO 1	Able to understand the use of OOPs concepts.
		CO 2	Able to solve real world problems using OOP techniques.
		CO 3	Able to understand the use of abstraction.
		CO 4	Able to understand the use of Packages and Interface in java.
		CO 5	Able to develop and understand exception handling, multithreaded applications with synchronization.
		CO 6	Able to understand the use of Collection Framework.
		CO 7	Able to design GUI based applications and develop applets for web applications.
2	Introduction to Embedded Systems	CO 1	To know the embracing view on embedded systems, their design and application in different systems of various sizes
		CO 2	Understanding the evolution of Embedded Systems over time, demonstrated by an integration approach in system design.
		CO 3	To understand the non-functional aspects of embedded systems, e.g. resource bounded-ness and dependability.
		CO 4	To know of state-of-the-art methods and techniques for embedded systems design such as requirements engineering, hardware-software integration, performance modelling and analysis, validation and testing.
		CO 5	The student is able to conduct research and design independently and has a scientific approach to complex problems and ideas.
		CO 6	The concepts and architecture of embedded systems
		CO 7	The concepts of real-time operating system
		CO 8	Different design platforms used for an embedded systems application
3	Computer Oriented Statistical Techniques	CO 1	Recognize elements and variable in statistics and summarize qualitative and quantitative data.
		CO 2	Calculate mean, median and mode for individual series.
		CO 3	Outline properties of correlation and compute Karl-Pearson's coefficient of correlation.
		CO 4	Learn non-parametric test such as the Chi-Square test for Independence as well as Goodness of Fit.
4	Software Engineering	CO 1	Students will be able to Meet the Information Technology Program Objectives of identifying and solving engineering problems
		CO 2	Students will be able to understand principles, concepts, methods, and techniques of the software engineering approach to producing quality software for large, complex systems
		CO 3	Students will be able to function effectively as a member of a team engaged in technical work.

		CO 4	Students will be able to think critically about ethical and social issues in software engineering for different applications
5	Computer Graphics and Animation	CO 1	Understand the basics of computer graphics, different graphics systems and applications of computer graphics.
		CO 2	To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.
		CO 3	Students are able to define the fundamentals of animation.
		CO 4	Extract scene with different clipping methods and its transformation to graphics display device.
		CO 5	Explore projections and visible surface detection techniques for display of 3D scene on 2D screen.
<b>TYBSCIT SEM 5</b>			
1	Software Project Management	CO 1	Students will be able to recall the reasons for Software Project failures.
		CO 2	Students will be able to initiate new software project.
		CO 3	Students will be able to develop work break down structure.
		CO 4	Students will be able to produce software project management Plan.
2	Internet of Things	CO 1	To learn and define the concepts of IOT.
		CO 2	To know about different technologies involved in IOT.
		CO 3	To learn different applications and scope of IOT.
		CO 4	To learn different web platforms and protocols used in IOT.
		CO 5	To learn different factors involved in choosing best microprocessor for IOT.
		CO 6	To know how to get funding for a business and different business models in IOT.
		CO 7	To learn the concepts of smart city development and ethics and waste management in IOT.
3	Advance Web Programming	CO 1	Students will be able to configure an asp.net application.
		CO 2	Students will be able to develop a data driven web application.
		CO 3	Students will be able in connecting to data sources and managing them.
		CO 4	Students will be able to maintain session and controls related information for user used in multi-user web applications Students will be able to maintain session and controls related information for user used in multi-user web applications.
4	Artificial Intelligence	CO 1	Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations.
		CO 2	Analyze and formalize the problem as a state space, graph, design heuristics
		CO 3	Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning
		CO 4	Select amongst different search or game based techniques to solve them
5	Next Generation Technology	CO 1	Students get to learn MongoDB fundamentals and can set up servers for basic administration
		CO 2	Students learn to analyze the data with MongoDB Aggregation Framework.
		CO 3	It covers new features and tools released with MongoDB. Students get aware of Non-relational DB which is the current need of market.
<b>TYBSCIT SEM 6</b>			
1	Software Quality Assurance	CO 1	Students will be able to identify the reasons for bugs and analyses the Principles in software testing to prevent and remove bugs.
		CO 2	Students will be able to Implement various test processes for quality improvement
		CO 3	Students will be able to apply the software testing techniques in commercial environments
2	Business Intelligence	CO 1	students will be able to: Identify the major frameworks of computerized decision support: decision support systems (DSS), data analytics and business intelligence (BI).
		CO 2	Students understands the foundations, definitions, and capabilities of DSS, data analytics and BI.
		CO 3	Students also understand the true value of analytics, depending how you define it, because through the exploration of historical and live data and application of different statistical, data mining, predictive, and other analytics' methods, it provides us with a better understanding of the future and the potential paths to follow.
3	Security in Computing	CO 1	Develop an understanding of security policies (such as authentication, integrity and confidentiality)
		CO 2	Determine appropriate mechanisms for protecting information systems ranging from operating systems ,network system , database management systems and to applications.
4	Principles of Geographic Information Systems	CO 1	Understanding the nature of geographically-distributed phenomena and issues concerning the handling, manipulation and analysis of spatial information.
		CO 2	Understanding the study of geographical information systems and science.
		CO 3	Awareness of the design and composition of digital and conventional mapping systems.
		CO 4	Gain Knowledge about the history of GIS, mapping and spatial data visualization.
		CO 5	Understanding the importance of the study of GI technologies, and their impact on society.
		CO 6	Understand the nature, formation, occurrence and distribution of natural and socio-economic phenomena;
		CO 7	Gain knowledge of applying GIS techniques for the production of GIS applications, maps and reports.
		CO 1	Students identify and analyze statutory, regulatory, constitutional, and organizational laws that affect the information technology professional.

5	Cyber Law	CO 2	Students locate and apply case law and common law to current legal dilemmas in the technology field.
		CO 3	Students apply diverse viewpoints to ethical dilemmas in the information technology field and recommend appropriate actions.
		CO 4	Students distinguish enforceable contracts from non-enforceable contracts.

### Department of Multimedia & Mass Communication (Programme Outcome)

Sr. No.	Programme	Programme Outcome	Programme Outcome
1	Bachelor of Arts In Multimedia and Mass Communication	PO1	Demonstrate knowledge of media industries and their relationship to culture and society, and the understanding of how communication works.
		PO2	Demonstrate the ability to apply rhetorical principles in a variety of creative, cinematic, organizational, professional and journalistic venues.
		PO3	Integrate knowledge, skills, and values that prepare them for future careers in our interconnected society, whether in mass media or advanced study.
		PO4	Develop a global awareness of political, social and corporate issues influenced by communication sensitivity and skills.
		PO5	Demonstrate ability to transform complex multimedia and Mass Communication and contemporary issues into problems, investigate, understand and propose integrated solutions using emerging technologies.
		PO6	Integrate ability to devise and conduct experiments, interpret data and provide well informed conclusions.
		PO7	Develop ability to select modern multimedia and Mass Communication tools, skills and techniques necessary for innovative solutions.
		PO8	Integrate research-related skills through research projects of current relevance and critical outcome.
		PO9	Create awareness of Moral and Ethical Awareness/Reasoning through sensitization and cultivation of moral and ethical values.
		PO10	Develop lifelong Learning towards better learning and application on business data; also show awareness for generation of new ideas and innovation.

### Department of Multimedia & Mass Communication (Programme Specific Outcome)

Sr. No.	Programme	Specific Outcome	Programme Specific Outcome
1	Bachelor of Arts In Multimedia and Mass Communication	PSO1	Prepare students for a wide variety of careers in business and industry, advertising, public relations and journalism, or advanced study.
		PSO2	Create and design emerging media products, including blogs, digital audio, digital video, social media, digital photography, and multimedia.
		PSO3	Equip the learners with professional skills essential for making career in Entertainment industry, Cinema, Television, OTT Platforms, social media platforms etc.

### Department of Multimedia & Mass Communication (Course Outcome)

Sr. No.	Course	Outcome	Course Outcome
<b>FYBAMMC SEM I</b>			
1	EFFECTIVE COMMUNICATION - 1	CO 1	To make the students aware of functional and operational use of language in media.
		CO 2	To equip or enhance students with structural and analytical reading, writing and thinking skills.
		CO 3	To introduce key concepts of communications.
2	FUNDAMENTALS OF MASS COMMUNICATION	CO 1	To introduce students to the history, evolution and the development of Mass Communication in the world with special reference to India.
		CO 2	To study the evolution of Mass Media as an important social institution.
		CO 3	To understand the development of Mass Communication models.
		CO 4	To understand the concept of New Media and Media Convergence and its implications
		CO 5	To develop a critical understanding of Mass Media
3	VISUAL COMMUNICATION	CO 1	To provide students with tools that would help them visualize and communicate.
		CO 2	Understanding Visual communication as part of Mass Communication
		CO 3	To acquire basic knowledge to be able to carry out a project in the field of visual communication
		CO 4	To acquire basic knowledge in theories and languages of Visual Communication
		CO 5	The ability to understand and analyze visual communication from a critical perspective
4	FOUNDATION COURSE –I	CO 1	To introduce students to the overview of the Indian Society.
		CO 2	To help them understand the constitution of India.
		CO 3	To acquaint them with the socio-political problems of India.
5	CURRENT AFFAIRS	CO 1	To provide learners with overview on current developments in various fields.
		CO 2	To generate interest among the learners about burning issues covered in the media
		CO 3	To equip them with basic understanding of politics, economics, environment and technology so that students can grasp the relevance of related news.
		CO 4	Twenty minutes of newspaper reading and discussion is mandatory in every lecture
		CO 1	Learner will be able to understand Media history through key events in the cultural history

6	HISTORY OF MEDIA	CO 2	To enable the learner to understand the major developments in media history.
		CO 3	To understand the history and role of professionals in shaping communications.
		CO 4	To understand the values that shaped and continues to influence Indian mass media
		CO 5	Learner will develop the ability to think and analyze about media.
		CO 6	To sharpen the reading, writing, speaking and listening skills that will help the students to understand the development of Media
<b>FYBAMMC SEM II</b>			
1	EFFECTIVE COMMUNICATION SKILLS -II	CO 1	To make the students aware of use of language in media and organization.
		CO 2	To equip or enhance students with structural and analytical reading, writing and thinking skills.
		CO 3	To introduce key concepts of communications.
2	FOUNDATION COURSE-2	CO 1	To introduce students to the overview of the Indian Society.
		CO 2	To help them understand the constitution of India.
		CO 3	To acquaint them with the socio-political problems of India
3	CONTENT WRITING	CO 1	To provide students with tools that would help them communicate effectively
		CO 2	Understanding crisp writing as part of Mass Communication
		CO 3	The ability to draw the essence of situations and develop clarity of thought.
4	INTRODUCTION TO ADVERTISING	CO 1	To provide the students with basic understanding of advertising, growth, importance and types.
		CO 2	To understand an effective advertisement campaigns, tools, models etc.
		CO 3	To comprehend the role of advertising , various departments, careers and creativity
		CO 4	To provide students with various advertising trends, and future.
5	INTRODUCTION TO JOURNALISM	CO 1	To help media students to acquaint themselves with an influential medium of journalism that holds the key to opinion formation & to create awareness.

2	Macro Economics concepts and	CO 1	To understand an overall working of the economy.
		CO 2	To know the working with external factors like foreign exchange.
3	E- commerce	CO 1	To provide an analytical framework to understand the emerging world of E-commerce
		CO 2	To make learner familiar with the current challenges and issues in E-commerce.
4	Research methodology for Business	CO 1	Clearly identify and analyse business problems and identify appropriate and effective ways to find solution to the problem.
		CO 2	Understand and apply the different types of research designs.
		CO 3	Formulate Proper research questions.
		CO 4	Analysed summerise key issues pertaining to research problem.
<b>MCOM SEM 3 (Advanced Accountancy Specialisation)</b>			
1	Project Work 1	CO 1	Students will acquire the ability to make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
		CO 2	Students will acquire the skills to communicate effectively and to present ideas clearly and coherently to specific audience in both the written and oral forms.
		CO 3	Students will acquire collaborative skills through working in a team to achieve common goals.

		CO 4	Students will be able to learn on their own, reflect on their learning and take appropriate actions to improve it.
2	Advanced Financial Accounting	CO 1	To Acquire necessary knowledge about preparation of banking company and Insurances final account.
		CO 2	Understanding the conversion method for foreign currency
3	Advanced Cost Accounting	CO 1	To enable learners to understand Equivalent Process, Allocation of overheads
		CO 2	To enable learners to understand Transfer Pricing, Responsibility Accounting etc
4	Direct Tax	CO 1	To understand different Heads of Income.
		CO 2	To Acquire necessary knowledge for computation of taxable income and tax thereon.
<b>MCOM SEM 4</b>			
1	Project Work 2	CO 1	Students will acquire the ability to make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
		CO 2	Communication Students will acquire the skills to communicate effectively and to present ideas clearly and coherently to specific audience in both the written and oral forms.
		CO 3	Collaboration Students will acquire collaborative skills through working in a team to achieve common goals.
		CO 4	Independent Learning Students will be able to learn on their own, reflect on their learning and take appropriate actions to improve it.
2	Advanced Financial management.	CO 1	To understand and gain knowledge with regard to topics of investments and project appraisal, capital structure and cost of capital
		CO 2	To understand causes and effects of credit financial crisis
		CO 3	To understand how finances are raised and impact on financial market.
		CO 4	To gain ability to solve and understand corporate financial cases
3	Advanced Corporate Financial	CO 1	Enable the understanding of consolidated B/S & Valuation of share & goodwill of the business.
		CO 2	Understands the concept of IFRS.
4	Indirect Tax - Introduction to GST.	CO 1	Understanding supply under GST
		CO 2	Understanding Time, Place and Value under GST
		CO 3	Acquire necessary knowledge about registration and computation of GST
<b>MCOM SEM 3 (Business Management)</b>			
1	Project Work 1	CO 1	Students will acquire the ability to make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
		CO 2	Students will acquire the skills to communicate effectively and to present ideas clearly and coherently to specific audience in both the written and oral forms.
		CO 3	Students will acquire collaborative skills through working in a team to achieve common goals.
		CO 4	Students will be able to learn on their own, reflect on their learning and take appropriate actions to improve it.
2	Human Resources Management	CO 1	To develop the understanding of the concept of human resource management and to understand its relevance in organizations.
		CO 2	To develop necessary skill set for application of various HR issues.
		CO 3	To analyse the strategic issues and strategies required to select and develop manpower resources
		CO 4	To integrate the knowledge of HR concepts to take correct business decisions
3	Entrepreneurial management	CO 1	To understand the nature of entrepreneurship
		CO 2	To understand the function of the entrepreneur in the successful, commercial application of innovations
		CO 3	To confirm an entrepreneurial business idea
		CO 4	To identify personal attributes that enable best use of entrepreneurial opportunities
		CO 5	To explore entrepreneurial leadership and management style
4	Organizational	CO 1	Analyze individual and group behaviour, and understand the implications of organizational behaviour on the process of management.
		CO 2	Identify different motivational theories and evaluate motivational strategies used in a variety of organizational settings.

7	Behavior	CO 3	To Evaluate the appropriateness of various leadership styles and conflict management strategies used in organizations.
		CO 4	To Analyse and assess the basic design elements of organizational structure and evaluate their impact on employees.
<b>MCOM SEM 4</b>			
1	Project Work 2	CO 1	Students will acquire the ability to make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
		CO 2	Communication: Students will acquire the skills to communicate effectively and to present ideas clearly and coherently to specific audience in both the written and oral forms.
		CO 3	Collaboration: Students will acquire collaborative skills through working in a team to achieve common goals.
		CO 4	Independent Learning: Students will be able to learn on their own, reflect on their learning and take appropriate actions to improve it.
2	Retail Management	CO 1	Explain the central role of retail in industrialised societies, and the impact of key market/retail trends upon this sector in the local and global context
		CO 2	Identify the key stakeholders and the roles/responsibilities of retail towards these stakeholders
		CO 4	Understand and apply appropriate frameworks to develop high level retail marketing strategy, and identify the role of marketing strategies in the building of brand equity and shareholder value in the retail industry
		CO 5	To Analyse how retail managers can make informed strategic choices in relation to managing channel partners, retail form (online vs. bricks and mortar), global
